■ What's Ready Now

Phase 1 — MVP (Install Week 1)

■■ What's Missing (4 Items)

Item	Why Needed	Effort	Timeline
Editorial Orchestration Skill	Automate daily workflow (GA4→AI→fact-check→WordPress)	40-60h	Phase 2 (Week 2-3)
Real-time Competitor Watch	Monitor competitor URLs + new articles daily	20-30h	Phase 2-3
A/B Testing Auto-Tuner	Suggest headline/content rewrites if <20% engagement	30-40h	Phase 3
Topic Clustering & Gaps	Map content + find under-covered topics	25-35h	Phase 2-3

■ Installation Roadmap

Week 1: Go Live (MVP)

Tue: Install fact-checker, seo-content, content-research
Wed: Install ai-writing, ai-image skills
Thu: Install crawl4ai, content-extraction
Fri: Install brand-voice, editorial-strategy, test E2E

Week 2-3: Scale (Phase 2)

marketing-analytics, technical-seo-checker
Start: Editorial orchestration custom skill (parallel dev)

Month 2+: Advanced (Phase 3)

Start: Competitor monitoring + A/B testing skills
Plan: Topic clustering implementation

■ For Roman (Business Owner)

What changes for you?

- Lisa reads GA4 + GSC manually
- Searches competitors manually
- Writes briefs for reporters
- Fact-checks each article
- Publishes manually to WordPress
- **Output:** 8 articles/week, 1,220 CZK per article

- 7 AM: Daily editorial plan auto-generated
- Lisa reviews + approves (20 min)
- AI drafts quick news (auto)
- Fact-check runs automatically (auto)
- Publish to WordPress (auto when approved)
- **Output:** 20+ articles/week, 154 CZK per article (or 424 with polish)

Your Financial Impact

- Content cost: 24,400 CZK
- Editor time: ~43 hours @ 250 CZK/h = 10,750 CZK
- **Total:** 35,150 CZK

- Content cost: 3,080 CZK
- Editor time: ~3 hours/week × 4 = 12h @ 250 = 3,000 CZK
- **Total:** 6,080 CZK
- **Savings:** 29,070 CZK/month ■

- Content cost: 3,080-7,700 CZK (depends on AI vs. polish)
- Editor time: ~5h/week × 4 = 20h @ 250 = 5,000 CZK
- **Total:** 8,080-12,700 CZK
- **Output:** 20+ articles (2.5x volume)
- **Per-article cost:** 40-63 CZK (vs. 1,220 now)
- **Savings:** 22,450+ CZK/month ■

Approval Workflow

→ Notify Roman (Slack/Discord) → Roman reviews draft
→ Roman approves → Publish (auto)

■ For Tom (Technical)

What you're implementing

- Verify GA4 service account + API access
- Configure WordPress REST API tokens (4 remaining sites)
- Set up ClawLink OAuth for GSC
- Deploy 18 skills to Lisa's workspace
- Configure daily workflow cron job

- Editorial orchestration skill (LangGraph)
- Trigger: Daily 7 AM
- Inputs: GA4 top keywords, GSC rankings, competitor URLs
- Process: Decision tree (Is this breaking news? Keyword opportunity? Competitive?)
- Output: Markdown editorial plan + AI draft queue

- Python + LangGraph (not Node.js)
- PostgreSQL for audit logs
- Ollama (local) or Anthropic (cloud) for LLM
- WordPress REST API (your existing)

- Phase 1 setup: ~16 hours (Lisa + guidance)
- Phase 2 orchestration: ~50 hours (pure dev)
- Phase 3 custom skills: ~100 hours (phased)

Monitoring & Logging

Verify each skill works
Review fact-check reports
Monitor API quota usage
Audit publication logs

Reusable Assets You'll Have

■ Timeline

Phase	Week	Deliverable	Owner
Phase 1	1	MVP workflow live on 1 site	Tom + Lisa
Phase 2	2-3	All 5 sites + orchestration	Tom + Lisa
Phase 3	4+	Advanced automation	Tom

■■ Risk Mitigation

What we're monitoring

Where humans stay in the loop
