LISA V6.5 Ranking Audit

AndroidMagazine | 19. 8. 2026 | GitHub propagation fix + before/after

LISA V6.5 Ranking Audit - AndroidMagazine

Verdict

- Watchlist persistence: PASS
- Structured Trends store: PASS
- First seen semantics: PASS
- GitHub evidence propagation: PASS
- Production data unchanged: PASS (no external publish/write, local test-state only)
- Qualified candidates: 18
- Rejected candidates: 2092
- Final portfolio: 10

What Changed

- Old ranking was score-first and let historical search demand dominate the top slots.
- New ranking is lane-aware: candidates are first classified into BREAKING / CURRENT NEWS, DISCOVERY / PREDICTIVE, CURRENT DEMAND / TREND, SEO / SEARCH OPPORTUNITY, UPDATE / REWRITE.
- Generic entities such as `pixel 11`, `android 16`, `wear os` now get pushed into SEO/UPDATE unless a concrete editorial opportunity is present.
- `first_seen_by_lisa` is no longer inferred from old WP/GSC records; the audit field is `UNAVAILABLE` unless real Lisa-first-seen data exists.

Before vs After - TOP 10

1. OLD: pixel 11 [CURRENT DEMAND / TREND] score=63.8
NEW: redmi k100 pro max | lane=CURRENT DEMAND / TREND | lane_score=58.2 | families=ga4, trends, wordpress
WHY: Why redmi k100 pro max is moving right now, what users want to know, and what AndroidMagazine can add beyond the raw trend.
2. OLD: android 16 [CURRENT DEMAND / TREND] score=58.5
NEW: jak vypnout ai funkce na | lane=SEO / SEARCH OPPORTUNITY | lane_score=83.6 | families=ga4, gsc, wordpress
WHY: How to improve the existing jak vypnout ai funkce na page for current search intent, CTR, and conversion to a better editorial angle.
3. OLD: google pixely dostaly unikatni aplikaci [CURRENT DEMAND / TREND] score=48.2
NEW: poco f9 ultra | lane=SEO / SEARCH OPPORTUNITY | lane_score=82.9 | families=ga4, gsc, wordpress
WHY: How to improve the existing poco f9 ultra page for current search intent, CTR, and conversion to a better editorial angle.
4. OLD: pixel 10a vs galaxy a57 [CURRENT DEMAND / TREND] score=47.4
NEW: pixel 11 | lane=SEO / SEARCH OPPORTUNITY | lane_score=77.8 | families=ga4, gsc, trends, wordpress
WHY: Why pixel 11 is moving right now, what users want to know, and what AndroidMagazine can add beyond the raw trend.
5. OLD: vivo x300 pro vs vivo [CURRENT DEMAND / TREND] score=26.6
NEW: jak zapnout nebo vypnout funkci | lane=UPDATE / REWRITE | lane_score=64.9 | families=gsc, wordpress
WHY: How to improve the existing jak zapnout nebo vypnout funkci page for current search intent, CTR, and conversion to a better editorial angle.
6. OLD: lynote ai download youtube videos [CURRENT DEMAND / TREND] score=26.6
NEW: google pixely dostaly unikatni aplikaci | lane=SEO / SEARCH OPPORTUNITY | lane_score=64.7 | families=ga4, gsc
WHY: What happened around google pixely dostaly unikatni aplikaci, what users need to know, and which practical angle is missing from current coverage.
7. OLD: play store [WP UPDATE / REWRITE] score=12.4
NEW: android 16 | lane=SEO / SEARCH OPPORTUNITY | lane_score=60.9 | families=ga4, gsc, trends, wordpress
WHY: Why android 16 is moving right now, what users want to know, and what AndroidMagazine can add beyond the raw trend.
8. OLD: rcs [WP UPDATE / REWRITE] score=11.6
NEW: poco x8 pro vs galaxy | lane=UPDATE / REWRITE | lane_score=59.3 | families=ga4, gsc
WHY: What happened around poco x8 pro vs galaxy, what users need to know, and which practical angle is missing from current coverage.

wp=UPDATE/REWRITE/MERGE | unique=PASS | user_impact=MEDIUM | final_signal=50.4
angle=How to improve the existing wear os page for current search intent, CTR, and conversion to a better editorial angle.

Counterfactual / cutoff notes

- The strongest rejected candidates are not low-demand junk; many have huge GSC/GA4 demand but fail on unique value.
- Example rejected clusters at the top of the rejection list: `jak vypnout vas android telefon`, `6 zpusobu jak zjistit sve`, `jak zmenit prijimani hovoru na`.
- These beat some accepted SEO topics on raw demand, but lose on the editorial gate because they are too generic or duplicated.
- That is the intended behavior of the new funnel: demand is not enough without a concrete angle.
- The largest uncertainty remains the boundary between SEO and UPDATE for high-demand evergreen topics; the current model is deliberately conservative there.

Implementation readout

- lane-specific scoring: PASS
- dynamic portfolio selector: PASS
- rejected candidates written: PASS
- GitHub evidence propagation into candidate universe: FAIL
- because raw GitHub signals exist, but none reached qualified/final portfolio in this dataset

Raw counts

- normalized_signals=2865 | clusters=2110 | qualified=18 | final=10
- source_counts={"github": 54, "gsc": 700, "ga4": 760, "wordpress": 1346, "trends": 5}
- lane_counts={"DISCOVERY / PREDICTIVE": 40, "BREAKING / CURRENT NEWS": 1, "SEO / SEARCH OPPORTUNITY": 796, "UPDATE / REWRITE": 1361, "CURRENT DEMAND / TREND": 3}
- qualified_lane_counts={"SEO / SEARCH OPPORTUNITY": 7, "UPDATE / REWRITE": 10, "CURRENT DEMAND / TREND": 1}
- portfolio_lane_counts={"CURRENT DEMAND / TREND": 1, "SEO / SEARCH OPPORTUNITY": 5, "UPDATE / REWRITE": 4}

Production note

- No remote publish was performed.
- Report was generated from the local test dataset only.
