LISA V6.5 News Discovery Test Audit

Created at: 2026-08-20T06:25:02Z

News implementation: PASS | News propagation: PASS | Production unchanged: PASS

Raw signals: 134 | Event clusters: 75 | Candidate universe: 75 | Qualified: 3 | Final portfolio: 2

Google News / RSS is only a secondary signal in this workflow. It can surface current demand or possible discovery, but it does not by itself establish a Discovery opportunity.

exclusive official samsung galaxy tab
Primary lane: BREAKING / CURRENT NEWS
Lane score: 31.5 | Editorial potential: MEDIUM
Rejection reason: No unique value
Supporting events count: 1 | Source diversity: 1
Sources: Android Headlines

Cutoff Notes

pixel 11 won the news cut because it combined the strongest lane score with the deepest existing demand, strong source diversity, and a clear update/rewrite path over existing coverage.

wear os won because it stayed above the update/rewrite threshold while the nearest rejected neighbors, such as Find Hub, Play Store, and Google Wallet, failed the lane threshold.

The strongest rejected news cluster was security, but it lost on unique value despite very broad source coverage.

Key Status

- News implementation: PASS
- News -> Candidate Universe propagation: PASS
- Production data unchanged: PASS
- Google News / RSS is a secondary signal, not a standalone Discovery trigger.
