QUALITY AUDIT: prvni skutecny vyber AndroidMagazine

Zdroj: **MORNING-REPORT-ANDROIDMAGAZINE-2026-08-19.json**

Executive summary

- Qualified candidates: 85
- Final portfolio: 8
- Top 8 je zatim jen casticne obhajitelnych.
- Top 1-4 jsou jeste datove slusne, ale TOP 5-8 uz jsou podle evidence **RANKING UNCERTAIN**.
- Ranking je prilis silne oprety o historickou GSC/GA4 poptavku.
- V top vyberu chybi skutecny Discovery signal a GitHub se do finalniho portfolia nepropsal.
- Cast kandidatu je stale jen obecna topic/query vrstva, ne plna editorial opportunity.

Co je na rankingu problematicke

1. Systém stale preferuje kandidaty s vysokym GSC/GA4 objemem, i kdyz maji nizsi novost a nulovy trend.

2. **CURRENT DEMAND / TREND** je v portfoliu preuzite. Final portfolio ma 6x CURRENT DEMAND / TREND a 2x WP UPDATE / REWRITE.

3. GitHub funguje jako sensor, ale v tomto behu nevyrobil zadny kandidat, ktery by presel az do finalniho vyberu.

4. Nektere vysoke topic clustery jsou prilis obecne. Spravne musi byt prelozeny na konkretni editorial opportunity:

- co se stalo

- co chce uzivatel vedet

- proc prave ted

- co pridame navic

TOP 10 audit

1. pixel 11

- Underlying story: Pixel 11 launch / upgrade / accessory cluster
- Supporting source families: GA4, GSC, Trends, WordPress
- Supporting signals: 74
- First information time: 2026-08-13
- First seen by Lisa: 2026-07-13
- Current momentum: GSC 2529 impressions, 128 clicks, pos 1.0; GA4 680 sessions; Trends 69
- GSC opportunity: high
- GA4 evidence: high
- Trends evidence: high
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: FRESH

- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 64.2
- Time advantage: 6d
- Final score: 63.8
- Verdict: obhajitelne, spravne #1

2. android 16

- Underlying story: Android 16 / QPR / settings cluster
- Supporting source families: GA4, GSC, Trends, WordPress
- Supporting signals: 42
- First information time: 2026-08-13
- First seen by Lisa: 2024-11-14
- Current momentum: GSC 834 impressions, 44 clicks, pos 4.0; GA4 614 sessions; Trends 28
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: FRESH
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 52.5
- Time advantage: 6d
- Final score: 58.5
- Verdict: stale-ish evergreen, ale stale obhajitelne

3. android 17

- Underlying story: Android 17 cluster
- Supporting source families: GA4, GSC, WordPress
- Supporting signals: 71
- First information time: 2026-08-13
- First seen by Lisa: 2025-10-29
- Current momentum: GSC 506 impressions, 59 clicks, pos 5.0; GA4 537 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 45.0
- Time advantage: 6d
- Final score: 50.4
- Verdict: search-valid, ale bez momenta

4. jak vypnout ai funkce na

- Underlying story: practical how-to around disabling AI features
- Supporting source families: GA4, GSC, WordPress
- Supporting signals: 21
- First information time: 2026-08-13
- First seen by Lisa: 2025-10-26
- Current momentum: GSC 11495 impressions, 255 clicks, pos 5.4; GA4 1157 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 44.8
- Time advantage: 6d
- Final score: 50.4
- Verdict: silny search topic, ne novinka

5. poco f9 ultra

- Underlying story: comparison/search cluster
- Supporting source families: GA4, GSC, WordPress
- Supporting signals: 44
- First information time: 2026-08-13
- First seen by Lisa: 2026-07-23
- Current momentum: GSC 4136 impressions, 230 clicks, pos 6.0; GA4 1256 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 44.5
- Time advantage: 6d
- Final score: 50.4
- Verdict: score vysoke, ale velmi historicky tahane

6. wear os

- Underlying story: Wear OS evergreen cluster
- Supporting source families: GA4, GSC, WordPress
- Supporting signals: 10
- First information time: 2026-08-13
- First seen by Lisa: 2014-06-25
- Current momentum: GSC 319 impressions, 19 clicks, pos 9.9; GA4 131 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE

- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 42.5
- Time advantage: 6d
- Final score: 50.4
- Verdict: evergreen backlog, ne top portfolio piece

7. galaxy z fold8 ultra vs

- Underlying story: foldable comparison cluster
- Supporting source families: GA4, GSC, WordPress
- Supporting signals: 5
- First information time: 2026-08-13
- First seen by Lisa: 2026-07-27
- Current momentum: GSC 126 impressions, 10 clicks, pos 8.1; GA4 68 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 43.5
- Time advantage: 6d
- Final score: 49.3
- Verdict: obhajitelne, ale slabsi nez rank nad nim

8. google pixely dostaly unikatni aplikaci

- Underlying story: specific Pixel feature / app feature story
- Supporting source families: GA4, GSC
- Supporting signals: 4
- First information time: 2026-08-13
- First seen by Lisa: 2026-08-13
- Current momentum: GSC 1230 impressions, 73 clicks, pos 7.5; GA4 372 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: CREATE
- Mainstream saturation: ACCEPTABLE
- Unique value: clear user-facing how-to / troubleshooting / comparison angle
- User impact: medium
- Predictive value: 43.8
- Time advantage: 6d
- Final score: 48.2
- Verdict: dobry candidate

9. pixel 10a vs galaxy a57

- Underlying story: direct buyer decision comparison
- Supporting source families: GA4, GSC
- Supporting signals: 6
- First information time: 2026-08-13
- First seen by Lisa: 2026-08-13
- Current momentum: GSC 123 impressions, 20 clicks, pos 11.7; GA4 81 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 41.6
- Time advantage: 6d
- Final score: 47.4
- Verdict: korektni comparison slot, ale ciste search-led

10. poco x8 pro vs galaxy

- Underlying story: comparison cluster
- Supporting source families: GA4, GSC
- Supporting signals: 8
- First information time: 2026-08-13
- First seen by Lisa: 2026-08-13
- Current momentum: GSC 520 impressions, 46 clicks, pos 7.3; GA4 399 sessions; Trends 0
- GitHub evidence: unavailable
- WP status: UPDATE/REWRITE/MERGE
- Mainstream saturation: ACCEPTABLE
- Unique value: update/rewrite with added value
- User impact: medium
- Predictive value: 43.9
- Time advantage: 6d
- Final score: 46.6
- Verdict: ma lepsi raw demand nez #9, ale portfolio logika je stale search-heavy

Counterfactual audit TOP 8

- #1 **pixel 11** vs **poco f9 ultra**: selected je lepsi. Ma silnejsi trend, vyssi source diversity a vyssi overall opportunity.
- #2 **android 16** vs **poco f9 ultra**: selected je lepsi. Ma broad platform intent a lepsi kombinaci GSC + GA4 + Trends.
- #3 **android 17** vs **realme gt 8 pro vs**: selected je obhajitelny, ale uz jen na hranici.
- #4 **jak vypnout ai funkce na** vs **poco x8 pro vs galaxy**: selected je obhajitelny, ale rozdil je uz maly.
- #5 **vivo x300 pro vs vivo** vs **realme gt 8 pro vs**: selected je slabsi. **RANKING UNCERTAIN**.
- #6 **lynote ai download youtube videos** vs **galaxy buds4 pro vs huawei**: selected je slabsi. **RANKING UNCERTAIN**.

- #7 **play store** vs **wear os** nebo **poco f9 ultra**: selected je vyrazne slabsi. **RANKING UNCERTAIN**.
- #8 **rcs** vs **jak vynutit lte nebo 5g**: selected je taky slabsi. **RANKING UNCERTAIN**.

Bias check

- Final portfolio: 6x CURRENT DEMAND / TREND, 2x WP UPDATE / REWRITE.
- Zadne Discovery tema se do final portfolia nedostalo.
- GitHub se do final vyberu nepropsal.
- To znamena, ze ranking je stale moc oprety o historickou search poptavku.
- Category bias je realny: system favorizuje evergreen search clustery a neni dostatecne penalizovany za slabou novost.

Bottom line

- Top 1-4: jeste obhajitelne.
- Top 5-8: ranking uncertain.
- Nejvetsi problem neni v radku #1, ale ve finalnim portfoliu a jeho filler slotech.
- Pred tuningem vah je treba vyradit stale evergreen filler kandidaty a posilit novost, momentum a time advantage.
