Reworked AndroidMagazine selection for today

Romanovy připomínky jsem promítla do nového výběru. Discovery jsem držela jen tam, kde stojí na skutečném early signálu; mainstreamové launch coverage už nepovažuju za Discovery.

1. Android 17 zpřísňuje audio na pozadí: které aplikace mohou začít zlobit

WP 78796 | DISCOVERY / PREDICTIVE | CREATE | MEDIUM confidence

Kategorie: 25

Autor: redaktor

Timing: Publish now, then monitor support noise.

Reality: PASS

Doporučený titulek: Android 17 zpřísňuje audio na pozadí: které aplikace mohou začít zlobit

Where was it discovered? Android Developers docs / release notes

What are the early signals? Official behavior change, release notes, background audio hardening

How many major media already cover it? Low

Why could this become a hit? Apps with background audio will trigger support/search as soon as Android 17 rolls out

Expected time horizon: 24h–3d

Why now: Official docs just landed and user impact can surface as soon as more apps are tested on Android 17.

Unique value: Přeložit vývojářskou změnu do uživatelského dopadu, přidat kontrolní seznam a varovné scénáře.

WP check: NO DIRECT MATCH; RELATED: general Android 17 coverage exists, but not this behavior change.

Cannibalization risk: LOW

GSC / signal: WHERE WAS IT DISCOVERED? Android Developers release notes and background audio hardening docs. WHAT ARE THE EARLY SIGNALS? Official behavior change, release notes, and repeated references to background audio restrictions. HOW MANY MAJOR MEDIA ALREADY COVER IT? Low. WHY COULD THIS BECOME A HIT? Když se to dotkne Spotify-like, podcast and fitness apps, začne se to rychle šířit napříč support a community hledáním. EXPECTED TIME HORIZON: 24h–3d.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 66 / 82

Evidence strength: EMERGING

Local signal: LOW

Global signal: MEDIUM

Trend velocity: MEDIUM

Trend acceleration: MEDIUM

Recommended author confidence: LOW

Next action: Draft outline with affected apps and verification checklist.

2. Google Wallet na Pixel Watch: expresní platby přímo z hodinek

WP 78797 | CURRENT DEMAND / TREND | CREATE | HIGH confidence

Kategorie: 19

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Google Wallet na Pixel Watch: expresní platby přímo z hodinek

Why now: Google just documented the feature in release notes; this is the moment to explain it before support questions spike.

Unique value: Přesný postup + troubleshooting + omezení podle regionu, ne jen oznámení funkce.

WP check: NO DIRECT MATCH; RELATED Wallet coverage exists, but not express pay on watch.

Cannibalization risk: LOW

GSC / signal: Source: Google System Services Release Notes (Aug 2026) notes that Wear users can set up express pay for Pixel Watch directly from the watch. GSC signal is broad across wallet queries, but this specific intent is not saturated. EXPECTED TIME HORIZON: immediate.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 74 / 54

Evidence strength: PROVEN

Local signal: MEDIUM

Global signal: HIGH

Trend velocity: HIGH

Trend acceleration: MEDIUM

Recommended author confidence: MEDIUM

Next action: Prepare step-by-step screenshots for Pixel Watch setup.

3. Pixel Watch 5: co říká oficiální nápověda o kompatibilitě, nabíjení a specifikacích

WP 78798 | CURRENT DEMAND / TREND | CREATE | HIGH confidence

Kategorie: 25

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Pixel Watch 5: co říká oficiální nápověda o kompatibilitě, nabíjení a specifikacích

Why now: People searching Pixel Watch 5 need a non-leak, trustable reference page.

Unique value: Převést support data na rozhodovací článek: koupit / počkat / přejít z Pixel Watch 4.

WP check: NO DIRECT MATCH; there are many leak stories, but not an official-spec explainer.

Cannibalization risk: MEDIUM

GSC / signal: Query family around google pixel watch 5 still exists in GSC, but most current coverage is leak-heavy. Official help content is the cleaner hook.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 68 / 40

Evidence strength: PROVEN

Local signal: LOW

Global signal: MEDIUM

Trend velocity: MEDIUM

Trend acceleration: LOW

Recommended author confidence: MEDIUM

Next action: Extract exact spec lines from the support page and build a short comparison table.

4. Galaxy Watch6 LTE: proč nefungují hovory bez Bluetooth a jak to ověřit

WP 78799 | SHOULD WRITE | CREATE | MEDIUM confidence

Kategorie: 19

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Galaxy Watch6 LTE: proč nefungují hovory bez Bluetooth a jak to ověřit

Why now: The query already has impressions without clicks; a sharper troubleshooting article can capture that intent.

Unique value: Kombinace komunitního problému + přesný troubleshooting + rozdíl mezi LTE a Bluetooth scénářem.

WP check: RELATED pages exist for general Galaxy Watch calls, but not this LTE-specific failure mode.

Cannibalization risk: MEDIUM

GSC / signal: GSC: galaxy watch 6 classic lte chamadas não funcionam = 46 impressions, 0 clicks, position 9.9. RELATED query: how to call from samsung galaxy watch. Community threads point to recurring LTE activation / Bluetooth dependency confusion. EXPECTED TIME HORIZON: immediate.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 71 / 46

Evidence strength: EMERGING

Local signal: MEDIUM

Global signal: MEDIUM

Trend velocity: MEDIUM

Trend acceleration: LOW

Recommended author confidence: MEDIUM

Next action: Build a 3-step diagnostics flow and separate LTE vs Bluetooth symptoms.

5. Android 17 a spotřeba dat: jak najít aplikaci, která žere data v popředí i na pozadí

WP 78800 | SHOULD WRITE | CREATE | MEDIUM confidence

Kategorie: 19

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Android 17 a spotřeba dat: jak najít aplikaci, která žere data v popředí i na pozadí

Why now: Users still search for data drain problems and Android 17 changes make the steps worth refreshing.

Unique value: Nový Android 17 kontext + praktický postup + rozdíly mezi výrobci.

WP check: RELATED English page exists, but the Czech Android 17 angle is not direct cannibalization.

Cannibalization risk: MEDIUM

GSC / signal: GSC families: data usage / data usage android / how to check data usage on android show weak ranking but persistent demand. Existing English article exists, but the Android 17 angle and local Czech treatment are new.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 65 / 38

Evidence strength: EMERGING

Local signal: MEDIUM

Global signal: MEDIUM

Trend velocity: LOW

Trend acceleration: LOW

Recommended author confidence: MEDIUM

Next action: Write a branded step-by-step with screenshots from Pixel and Samsung.

6. Samsungu přestaly fungovat RCS? Co znamená „not supported by carrier“ a co s tím

WP 78801 | SHOULD WRITE | CREATE | MEDIUM confidence

Kategorie: 18

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Samsungu přestaly fungovat RCS? Co znamená „not supported by carrier“ a co s tím

Why now: The error keeps showing up in community threads, which means the intent is alive.

Unique value: Jasný troubleshooting pro konkrétní error, ne další obecný článek o RCS.

WP check: RELATED Google Messages / RCS coverage exists, but not this exact error-driven angle.

Cannibalization risk: MEDIUM

GSC / signal: Support/community threads show recurring RCS carrier errors and forced Samsung -> Google Messages transitions. Good long-tail intent, lower saturation than generic Google Messages launch pieces.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 62 / 44

Evidence strength: EMERGING

Local signal: MEDIUM

Global signal: HIGH

Trend velocity: MEDIUM

Trend acceleration: LOW

Recommended author confidence: MEDIUM

Next action: Collect exact wording of the error and a carrier/app troubleshooting flow.

7. Pixel 11: oficiální detail o chytrých návrzích do Wallet, Map a Kalendáře

WP 78802 | CURRENT DEMAND / TREND | CREATE | HIGH confidence

Kategorie: 25

Autor: Roman Zavřel

Timing: Publish today.

Reality: PASS

Doporučený titulek: Pixel 11: oficiální detail o chytrých návrzích do Wallet, Map a Kalendáře

Why now: Official launch copy already talks about everyday help, which is the strongest user angle.

Unique value: Ne marketing, ale praktický rozpad funkcí na konkrétní scénáře používání.

WP check: RELATED Pixel 11 launch pieces exist, but this is the useful-features angle.

Cannibalization risk: MEDIUM

GSC / signal: Source: official Pixel 11 launch page says the phones come with more proactive Gemini support and time-saving personal help. This is still current demand, not discovery, because launch coverage is already broad.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 73 / 34

Evidence strength: PROVEN

Local signal: MEDIUM

Global signal: HIGH

Trend velocity: HIGH

Trend acceleration: LOW

Recommended author confidence: HIGH

Next action: Pull 3 real-world examples of the Wallet/Maps/Calendar suggestions.

8. Telefony s 8000mAh baterií v roce 2026: které modely to skutečně mají a proč

WP 78803 | CURRENT DEMAND / TREND | CREATE | MEDIUM confidence

Kategorie: 25

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Telefony s 8000mAh baterií v roce 2026: které modely to skutečně mají a proč

Why now: Battery size is becoming a mainstream buying criterion again.

Unique value: Srovnávací přehled napříč značkami a reálný dopad na výdrž, ne jen seznam mAh.

WP check: NO DIRECT MATCH; topic is broader than existing individual model pieces.

Cannibalization risk: LOW

GSC / signal: GSC shows generic smartphone battery queries, and external coverage points to 8000mAh and even larger cells in 2026. This is a clean trend story with broad audience potential.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 69 / 58

Evidence strength: EMERGING

Local signal: LOW

Global signal: HIGH

Trend velocity: HIGH

Trend acceleration: MEDIUM

Recommended author confidence: MEDIUM

Next action: Build a model list with official capacities and a short verdict per device.

9. Tecno Pova 8 5G: herní Android s 8000mAh baterií, který tlačí výdrž před design

WP 78804 | CURRENT DEMAND / TREND | CREATE | MEDIUM confidence

Kategorie: 25

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Tecno Pova 8 5G: herní Android s 8000mAh baterií, který tlačí výdrž před design

Why now: It is a concrete example of the battery race and likely to pull long-tail search.

Unique value: Proměnit specifikaci v praktické rozhodnutí pro čtenáře.

WP check: NO DIRECT MATCH; appears new for this device.

Cannibalization risk: LOW

GSC / signal: GSMArena shows Tecno Pova 8 5G with 8000mAh battery. It fits the broader battery story and gives us a concrete example for readers.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 67 / 52

Evidence strength: PROVEN

Local signal: LOW

Global signal: HIGH

Trend velocity: MEDIUM

Trend acceleration: MEDIUM

Recommended author confidence: MEDIUM

Next action: Pull exact spec sheet and compare it with a mainstream 5000mAh phone.

10. Galaxy Watch Ultra2: 800mAh baterie a 60 hodin výdrže, ale co ukáže praxe?

WP 78805 | CURRENT DEMAND / TREND | CREATE | HIGH confidence

Kategorie: 25

Autor: redaktor

Timing: Publish today.

Reality: PASS

Doporučený titulek: Galaxy Watch Ultra2: 800mAh baterie a 60 hodin výdrže, ale co ukáže praxe?

Why now: Fresh official claims plus community battery debate make a strong practical hook.

Unique value: Spojit oficiální claimy s reálnými scénáři použití a komunitními reakcemi.

WP check: NO DIRECT MATCH; this specific Ultra2 angle is new.

Cannibalization risk: LOW

GSC / signal: Official Samsung page says 800mAh battery, up to 60h with AOD on, and 40% charge in 30 minutes. Community threads are already debating whether the runtime matches the claim.

Signal score breakdown: GSC 20 | Trend 15 | Freshness 10 | Historical 15 | Discover 15 | Global 15 | Commercial 5 | Gap 5

Opportunity / Predictive: 70 / 44

Evidence strength: PROVEN

Local signal: LOW

Global signal: HIGH

Trend velocity: HIGH

Trend acceleration: MEDIUM

Recommended author confidence: MEDIUM

Next action: Gather the exact Samsung claim and one or two user battery experiences.
